DAC BEACHCROFT

DACB Discover

eDiscovery services for use on early case assessment, investigations, cyber breaches, disclosure, and other use cases.

Collecting, sifting, and reviewing large quantities of documents and other data sources is a critical part of the litigation process. That's why we designed DACB Discover to provide a time-saving, cost-effective, and efficiency-enhancing solution.

DACB Discover is an e-discovery, early case assessment, and disclosure solution that enables you to seamlessly use established document review platforms without the need to separately instruct a third-party provider.

DACB Discover combines legal expertise with highly specialised digital knowledge, providing a one-stop shop for you.

DACB Discover allows you to ingest, review, and create productions for multiple data types and can be used as a principal depository and review platform for evidence and unused material in various matters.

The benefits include:

- **Saving time:** Eliminates the need for gathering quotes and contracting.

- **Offering competitive pricing:** Provides cost-effective solutions with no processing fees and competitive data hosting rates.

- **Increasing efficiency:** Speeds up manual review even on small datasets.

What services does DACB Discover offer?

Two platforms to choose from to match the complexity of your job or preference:

1. Relativity: Designed for project managed e-disclosure and handling complex matters

2. Sightline: A self-service platform that includes:

- De-duplication & email threading
- Redaction
- Machine learning review
- Communication heat mapping
- Phonetic audio review

Global Digital Forensic Team Data Collection & legal hold

Project Management & Specialist Analytic services

Sensitive Data Detect

TAR (Technology Assisted Review): Utilises machine learning to create workflows that prioritise or minimise documents for manual review.
