Please note that there are new categories of whiplash injury that do not compare on a like for like basis with the old categories. This needs careful consideration. The change that is anticipated to drive inflation the most is the category of "moderate" whiplash valued at €20,400 - €30,200		
Back Injuries		
Again there are new categories in relation to soft tissue injuries for back injuries. It is therefore not possible to compare like with like. It will no doubt be argued that the old "significant ongoing" valuation (€18,300 - €69,700) is the equivalent of the new severe and permanent category (€52,300 - €92,000).
